Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-36 drawn to authorizing and identifying customers via proximity code system, classified in class 705 subclass 76.
 - II. Claims 37-47, drawn to trending technology requirements and customer needs, classified in class 705 subclass 11.
 - III. Claims 48 drawn to integrating a plurality of software programs, classified in class 705 subclass 1.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions I, II and III are different in function and operation.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 3621
